Expert Avalara Integration

The Power of AvaTax Calc

Real-time access to the most current rates and taxability rules with your ERP or billing system

Tax integration for E-Business Suite, PeopleSoft & JD Edwards

SALES TAX AUTOMATION

TPC	TAX POLICY CENTER

"Our tax system could be simple if its only purpose were to raise revenue. But it has other goals, including fairness, efficiency, and enforceability. And Congress has used the tax system to influence social policy as well as to deliver benefits for specific groups and industries."

Avalara Services

Sales Tax is complicated. AvaTax makes it easy.

SmartERP professionals represent an experienced team with extensive knowledge of third–party tax solutions as well as with ERP, eCommerce, and financial accounting systems.

Our professional consulting team works closely with your Tax, Finance and IT teams, to seamlessly integrate your ERP system with cloud–based Avalara AvaTax™.

With over ten years' experience with E–Business Suite, PeopleSoft and JD Edwards, we have developed proven methodologies, connectors and best practices to efficiently implement tax solutions to automate each of our clients' specific taxation requirements, saving time, effort and costs. This broad–based experience in tax, technology, and business practices uniquely qualifies us to work with corporations large and small to implement their tax solution correctly the first time. We have assisted many ERP clients to successfully implement and integrate to AvaTax.

Implementation Services
This is the complete life cycle engagement. We do it all for you, from setup, integration to customization and project management—everything needed to get the system working in your environment. These engagements typically run from two to six months, depending upon the client's needs.

Integration Services
These services involve integrating Avalara solutions with a client's ERP or financial system using off–the–shelf adaptors.

Custom Adaptor Development
When an off–the–shelf adaptor does not yet exist, clients can engage us to build the adaptor for them. This ensures seamless connectivity and data exchange between AvaTax and the client's ERP or financial system.

ERP – Avalara Integration

Avalara AvaTax Features

Precise Rate Determination
Advanced geocoding technology provides the basis for precise identification of tax jurisdictions and roll-up to a total tax rate.

Sourcing Rules
AvaTax is programmed with the latest information for handling destination based, origin based, and hybrid sourcing rules.

Address Validation
The AvaTax calculation engine encompasses the most accurate and up-to-date, U.S. Postal Service-approved, address data available.

Product Taxability
Avalara's AvaTax engine stores hundreds of thousands of product taxability rules for jurisdictions across the U.S. Even better, these rules are constantly updated in the cloud so your tax calculations are always accurate.

Reporting
AvaTax generates summary and detailed reports, on demand, easily and accurately.

Common Add-Ons
Consumer Use and International tax calculation. Automated filing and remittance with Avalara Returns. Robust exemption certificate management via Avalara

Why SmartERP?

- Extensive knowledge of AvaTax

- Deep understanding of ERP, eCommerce, and financial accounting systems

- Best practice tax integration services

- Design, development, and configuration of off-the-shelf adaptors to AvaTax

- Solutions, tools and utilities to streamline AvaTax implementations

- Deep ERP and integration technology expertise

Avalara Services

SmartERP Integration

SmartERP professionals represent an experienced team with extensive knowledge of third-party tax solutions as well as with most ERP, eCommerce, and financial accounting systems.

Key Activities

- Understand "As-Is" structure
- Determine initial scope
